

Report To

The Mississippi Legislature

STATE TRAVEL EXPENSE ACCOUNT ANALYSIS FOR FISCAL YEAR 1988

January 17, 1989

Total in-state and out-of-state travel reimbursements for state employees and officials amounted to \$17,197,895 in FY 1988. This amount was a 8.5 percent increase over FY 1987 expenditures, but still slightly less than the FY 1986 amount. Tables A through M in this report list the 200 state employees or officials with the highest travel expense in each category. Tables N through P provide comparisons between FY 1987 and FY 1988. In addition, Table Q indexes names in Tables A through M. The purposes of the report are to point out the significance of individual travel expenses and to provide agency management with comparative information. Users should read the introductory narrative before using the tables. PEER will prepare special reports from the data base for any legislator upon request.

The PEER Committee

PEER: THE MISSISSIPPI LEGISLATURE'S OVERSIGHT AGENCY

The Mississippi Legislature created the Joint Legislative Committee on Performance Evaluation and Expenditure Review (PEER Committee) by statute in 1973. A standing joint committee, the PEER Committee is composed of five members of the House of Representatives appointed by the Speaker and five members of the Senate appointed by the Lieutenant Governor. Appointments are made for four-year terms with one Senator and one Representative appointed from each of the U. S. Congressional Districts. Committee officers are elected by the membership with officers alternating annually between the two houses. All Committee actions by statute require a majority vote of three Representatives and three Senators voting in the affirmative.

An extension of the Mississippi Legislature's constitutional prerogative to conduct examinations and investigations, PEER is authorized by law to review any entity, including contractors supported in whole or in part by public funds, and to address any issues which may require legislative action. PEER has statutory access to all state and local records and has subpoena power to compel testimony or the production of documents.

As an integral part of the Legislature, PEER provides a variety of services, including program evaluations, economy and efficiency reviews, financial audits, limited scope evaluations, fiscal notes, special investigations, briefings to individual legislators, testimony, and other governmental research and assistance. The Committee identifies inefficiency or ineffectiveness or a failure to accomplish legislative objectives, and makes recommendations for redefinition, redirection, redistribution and/or restructuring of Mississippi government. As directed by and subject to the prior approval of the PEER Committee, the Committee's professional staff executes audit and evaluation projects obtaining information and developing options for consideration by the Committee. The PEER Committee releases reports to the Legislature, Governor, Lieutenant Governor, and agency examined.

The Committee assigns top priority to written requests from individual legislators and legislative committees. The Committee also considers PEER staff proposals and written requests from state officials and others.

TO: Individuals Receiving FY 1988 State Travel Expense Report
FROM: John Turcotte, Executive Director
SUBJECT: Error In Travel Data
DATE: February 27, 1989

According to information supplied by the Fiscal Management Board, the amount of FY 1988 travel expense for Supreme Court Justice Lenore L. Prather was overstated by \$2,155.34 (see attached letter). Thus the amounts and rankings of Justice Prather's travel expenses are actually lower than they appear in the PEER report State Travel Expense Account Analysis for Fiscal Year 1988.

Please note this change in your reading of the report. This was not an error of the PEER Committee nor of the Supreme Court staff.

STATE OF MISSISSIPPI

RAY MABUS
GOVERNOR

February 23, 1989

Ms. Gail Duckworth, Fiscal Officer
Ms Supreme Court
Gartin Building
Jackson, Ms 39205

Dear Ms. Duckworth:

This is to confirm the recent conversation you had with our office staff concerning the travel records for Judge Prather. The travel voucher for July, 1988, travel was processed as June travel by Req. No. 2051-659 in FY'88 in error. The amount of the July travel was \$ 1,077.67 (Copy attached).

When this was discovered in August, 1988, we requested that your office prepare a payment for this amount from your FY'89 funds and deposit the refund back into your FY'88 funds. This would have an effect of moving the travel expenses into FY'89 and correcting the travel expense file for Judge Prather in FY'88.

In August, 1988, you processed your Req. No. 2051-139 (Copy attached) to make this correction as we requested. However on this particular requisition you indicated it to be paid from FY ending June 30, 1988, in error. Our office failed to catch this error and wrote the warrant from FY'88 fund and then deposited the refund into FY'89 funds. This resulted in a complete reversal of the desired effects that we wanted.

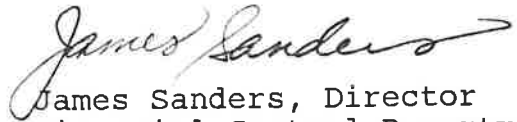

Since this error was not discovered prior to August 31, 1988, the FY'88 records were closed and all yearly master files were prepared and microfilmed. The result is that the travel file indicates Judge Prather's travel for FY'88 is overstated by \$ 2,155.34 and the travel file for FY'89 will be understated by the same amount.

This situation should not have happened with as many different checks and people that were involved but unfortunately it did and there is no means to correct the prior year records at this time.

If any additional is needed please contact my office.

Sincerely,

FISCAL MANAGEMENT BOARD

Dear Mr. Turcotte:

As per our phone conversation of yesterday, I am enclosing a copy of a letter to the Supreme Court from the Financial Control Department of the Fiscal Management Board. This letter and its attachments explain the error made in calculating the travel expenses of Justice Lenore L. Prather for fiscal year 1988.

I appreciate your assistance and commitment to add the addendum to the state travel expense account analysis report. If you need further information or assistance, please notify me immediately.

Sincerely,

JOINT LEGISLATIVE COMMITTEE
ON PERFORMANCE EVALUATION
AND EXPENDITURE REVIEW
STATE TRAVEL EXPENSE ACCOUNT ANALYSIS FOR FISCAL YEAR 1988

INTRODUCTION

This report is an informational tool designed to familiarize state government management with the size and scope of travel expenditures incurred by state employees and officials. The document does not include several categories of employees and officials. This occurs where data is not centrally accessible by computer or where other sources already provide the information. The report does not list the employees of junior colleges, senior colleges, and a few other agencies because the law does not require them to submit expense reimbursement vouchers to the Fiscal Management Board. Also, the report does not include legislative expenses of state legislators because the State Department of Public Accounts publishes this information annually as required by Section 113 of the Mississippi Constitution. For those agencies and institutions included, FY 1988 reimbursements for both in-state and out-of-state travel amounted to \$17,197,895 compared to \$15,847,144 in FY 1987, for a 8.5 percent increase in FY 1988. However, the FY 1988 travel expenditures are slightly less than the FY 1986 travel expenditures.

The report consists of thirteen different tables, each listing up to 200 state employees or officials with the highest travel expense for each given category of expense. Tables A through M, listed below, show the state agency or fund title to which the expenses were charged, together with the amounts reimbursed. The tables are established by the following expenses:

- A. Combined in-state and out-of-state travel, all categories
- B. In-state travel, all categories combined
- C. In-state mileage
- D. In-state subsistence
- E. In-state rented vehicle
- F. In-state public carrier
- G. In-state other (miscellaneous)
- H. Out-of-state travel, all categories combined
- I. Out-of-state mileage
- J. Out-of-state subsistence
- K. Out-of-state rented vehicle
- L. Out-of-state public carrier
- M. Out-of-state other (miscellaneous)

The total amount of funds expended in each category and the average travel expenditure for the top 200 employees are given at the end of each table.

Tables N through P, listed below, provide a comparison of FY 1987 travel expenses for each employee ranked in the top 200 to FY 1988 and show travel expenses for FY 1987 and FY 1988 for the following categories:

- N. Combined in-state and out-of-state travel
- O. In-state travel
- P. Out-of-state travel

If an employee ranked in the top 200 in FY 1987, but not in FY 1988, the term "unranked" appears next to that individual's name. Total travel expenses and averages for the top 200 for both FY 1987 and FY 1988 appear at the end of each table.

Table Q is an index of state employees that ranked in the top 200 in FY 1988 for travel expenses. The table provides an alphabetical listing of state employees whose names appear in this report, the table or tables in which an individual's name appears, and what rank the individual holds in that table. An individual may be listed in the index more than once, depending upon the number of expense categories in which the individual ranked. Several of the categories had less than 200 individuals charging expenses to them; therefore, the respective tables reflect only the number incurring these expenses.

It should be noted that PEER did not determine justification for individual travel expenditures, verify any travel vouchers against the data supplied in computer-readable form, or formulate any findings or conclusions from this data. The intent of the report was not to discover excesses or abuses, but rather to point out the significance of individual travel expenses and to provide agency management with comparative information.

Users should exercise caution in reviewing the tables to avoid any misinterpretations or erroneous conclusions. The following points should be considered:

1. Unlike office-bound, Jackson-based employees, many state officials (including commission and board members) serve on a part-time basis. These officials live in communities throughout the state, and to fulfill their duties they must often travel to Jackson and other areas. Frequent trips result in the travel expenses indicated.
2. Many of the employees listed in the tables hold travel-intensive positions, such as bank examiners, auditors, real estate appraisers, and investigators. These employees are required to travel on a full-time basis, and therefore incur heavy travel expenses.

3. Several of the employees listed in the tables, such as tax auditors and economic development specialists, are required to travel out-of-state extensively. In most instances, out-of-state travel is more expensive than in-state travel on an individual trip basis.
4. Many state employees are required to utilize their personal vehicles on a daily basis while traveling on state business which accounts for large mileage reimbursements. In cases where an employee travels extensively or continuously by private vehicle, it would be more economical to provide state vehicles, although only a limited number are available.

The preceding examples, in addition to other individual situations, may justify what would otherwise appear to be excessive travel reimbursements.

PEER staff can provide additional information, including a complete listing of travel expenses incurred by all state employees and officials, upon request by members of the Legislature.

METHODOLOGY

Without cooperation from the Fiscal Management Board and the State Personnel Board, PEER could not have produced this report. The Fiscal Management Board's Financial Control Department furnished a tape containing travel records for FY 1988. PEER used the following data items from this file: the payee name as printed on the travel reimbursement check, the Social Security number of the payee, the fund number to which the travel was charged, the expenditure object code, and the amount of the expenditure. The file supplied by the State Personnel Board included Social Security numbers, names, and occupation titles of state employees.

First, the Fiscal Management Board's tape of travel expenditures was read. If the object code was not one of the ten listed in Appendix A on page 195, the record was ignored. If the payee's name was blank or was determined not to be the name of a person, then that payee's name was temporarily discarded in hopes that the Social Security number used with it would occur again with a person's name as payee. In addition, some fund numbers were combined if their titles as found in the Auditor of Public Accounts' Accounting Policies and Procedures were identical or very similar. Appendix B on page 196 shows which funds were combined.

Second, the expenditure amounts for each expenditure object code were summed for each Social Security number within each fund and for each fund. Then, the Social Security numbers of travelers were compared with the Social Security numbers of employees on the Personnel Board file. Some Social Security numbers that were similar, but not identical, and that met a matching criteria were assumed to be for the same person and were combined. Similarly, the Social Security numbers of travelers not found on the Personnel Board file were compared with each other and combined if they met the matching criteria. Also, for each traveler's Social Security number found on the Personnel Board file, the full name associated with the Social Security number was saved for use in the report. For a traveler's Social Security number not found on the Personnel Board file, the name occurring most often with that Social Security number on the travel file was used unless it was not the name of a person. In some cases, non-person names such as "Avanti Travel" had to be used when no other name was available.

Next, fund titles as specified in Accounting Policies and Procedures were merged with the fund numbers. Then a report was printed, in fund title order, showing the following items:

1. Name of person traveling
2. That person's occupational title
3. Amount of in-state mileage reimbursement
4. Amount of all other in-state reimbursement

5. Amount of total in-state reimbursement (sum of items three and four)
6. Percentage of item five of this fund's total in-state reimbursement
7. Amount of total out-of-state reimbursement
8. Percentage of item seven of this fund's total out-of-state reimbursement
9. Amount of total in-state and out-of-state reimbursement (sum of items five and seven)
10. Percentage of item nine of this fund's total in-state and out-of-state reimbursement

In the report, the reimbursement amounts for each object code, which initially were summed for each Social Security number within each fund, are summed for each Social Security number without regard to fund number, resulting in reimbursement amounts for each object code for each Social Security number during the the fiscal year. These amounts are ranked from highest to lowest, with the highest 200 individuals shown in the report. PEER chose that number of individuals arbitrarily. In some instances, there are fewer than 200 individuals using a particular object code.
